BRR Wins Design Excellence Award

BRR was recently recognized as having some of Kansas City's best and brightest designers after receiving a Bronze Design Excellence Award by Kansas City Home Design and Commercial Journal Kansas City. BRR's Bistro was entered in to the Commercial Tenant Finish, Architecture/Interior space category. As recognized in the July/August issue of Kansas City Home Design, "no matter the aesthetic or purpose, superlative design possesses several uncompromising elements: it must be beautiful, it must be functional, it must be original, and it must be relevant." BRR's Bistro design hits all of these design components with three distinct types of interaction: a soft seating area for small, friendly gatherings, a standing bar with or without barstools for quick, impromptu meetings and restaurant style seating with tables for the lunch time crowd. Rich countertops, warm wood tones, intricate lighting and soft seating help create a European flavor. Modern amenities like flat screen televisions and numerous varieties of coffee and tea round out this unique experience.

Congratulations, BRR!
