Canstruction 2009: Honorable Mention

Canstruction is a design and build competition benefitting food banks in over 120 North American cities. Each year design teams of architects, engineers, and interior designers set out to design the biggest, best, and most innovative structure using only canned goods and non-perishable food items. BRR's team began building our life-size Smart Car and gas pump in the early hours of the morning. Groups of 5 team members worked in shifts throughout the day. The entire structure, including the gas pump, showed intense attention to detail and design, earning BRR the Honorable Mention award.

More important than any awards are the numbers surrounding BRR's structure: we provided a total of over 7,000 pounds of canned goods to Harvesters – the Community Food Network. This is equivalent to just over 5,730 meals and approximately \$5380.00.
